Introduction

Puntland government has adopted decentralization policy, to decentralize the service delivery management at district level, to improve the equity service delivery, accountability, good governance, and to educate the communities to be accountable for their elected officials.

Therefore, PSAWEN has launched the first local government engaged decentralization program thorough three piloted selected Eyl, Jariban and Banderbayla,

Decentralization Process

During the process of decentralization, different steps have been taken, to create enabling environment whereby all the stakeholders participate the process to know the how the system will work, and they have gotten the opportunity for them decide their priorities with the support of the central government, and has been implemented through the following steps..

a. Adoption Memorandum of Understanding

To facilitate the decentralization processes, the roles and responsibilities of the LG and PSAWEN have been clearly written with in the MoU, to make sure stakeholder having common objectives for the program success.

b. Setting Priorities

With the technical support of the of central government, the local governments organized a consultative meeting/ forums between city councilors
